PROJECT

VIRTUAL CLASS ROOM

Dec-2021 - Mar 2025

- Replaced traditional classroom interaction with an online interactive platform
- Enabled real-time student-faculty communication using Java RMI
- Improved accessibility and engagement through virtual learning tools
- Developed using HTML, CSS, JavaScript (Frontend) and PHP, MySQL (Backend)

ROSOYO BOOK

Mar 2024 - Sep 2024

- A collaborative platform to enhance student engagement through real-time communication and resource sharing
- Developed a user-friendly Android app for students to buy and sell academic books each semester
- Promotes sustainability and cost savings by enabling peer-to-peer book exchange
- Features include easy book listing, smart search, secure payments, and a user rating system for trust
- Technologies Used: Android Studio, Java

TASK MANAGEMENT SYSTEM

B.TECH (IT) - 2025

- Developed a web-based platform to create, assign, track, and manage tasks efficiently
- Enabled users to set task priorities, deadlines, and status updates for better productivity
- Included user authentication, dashboard views, and real-time task progress tracking
- Designed a responsive UI using HTML, CSS, and Bootstrap
- Handled backend logic with PHP and managed data using MySQL
